

I am a truck driver. I use the XM Radio as a tool in my trade. I pay for the service and feel I should be able to benefit from this service. Traffic and weather reports on a timely basis is very important. I do not have to wait for the top of the hour or the half hour for reports. Therefore I am opposed to HR Bill 4026. In the day of improved technology, why should NAB want to prevent advancement of information on a timely basis. Again I am opposed to HR Bill 4026.
